

ABS GROUP SEMINAR

Energy Management, ISO 50001:2011

ABS Group invites you to participate in our Seminar, "Energy Management, ISO 50001:2011" on 22 June 2016 in Hamburg, Germany.

Energy management is a significant priority for shipping companies as they address CO2 emissions and the regulatory requirements they are facing. The EU Directive 2012/27, regarding Energy Efficiency, provides a mandatory requirement in the field of energy management for enterprises, and is applicable to the entire logistics sector.

ISO 50001 has been designed to support organizations in all sectors to use energy more efficiently, through the development of an energy management system.

ISO 50001:2011 provides a framework of requirements for organizations to:

- Develop a policy for more efficient use of energy
- Fix targets and objectives to meet the policy
- Use data to better understand and make decisions about energy use
- Measure the results
- Review how well the policy works, and
- Continually improve energy management

Qualified lead auditors will provide an overview of ISO 50001:2011 and how to implement, operate and certify to the standard.

This seminar will be of interest to owners, operators and other marine industry personnel who wish to increase their awareness and understanding of Energy Efficiency requirements.

Seminar attendance is free. Complimentary refreshments and lunch will be provided.

RSVP by 17th June to reserve your place:
