

FRIENDSHIP SYSTEMS

Engineering software for simulation-driven design

FRIENDSHIP SYSTEMS is the sole provider of engineering software dedicated to the simulation-driven design of functional surfaces such as ship hulls, energy saving devices, propeller, pumps and turbines. The company develops and distributes CAESSES®, a premium CAE Software for faster product design and optimized product quality. The software enables engineers to develop complex geometry, automatically undertake shape variations and readily assess performance with any external simulation code available, e.g. CFX, FINE/Marine, OpenFOAM and STAR-CCM+.

FRIENDSHIP SYSTEMS has a global customer base, including leading shipyards like ThyssenKrupp Marine Systems, Daewoo, Hudong Zhonghua and Sumitomo, component manufactures like KSB, Rolls-Royce Power Systems and VOITH, model basins like HSVA, SVA Potsdam and SSPA as well as renowned research institutes.
